| 24. Ureters (Number is not on the model. Ureters are represented by the yellow tubing.) | 49. Ductus deferens |
| 25. Right testicular artery | 50. Seminal vesicles |

CARE OF DENOYER-GEPPERT MODELS

Your Denoyer-Geppert model was designed and manufactured to provide years of satisfactory service. Our models are molded of durable vinyl plastic. The finest lacquers and inks are used in the hand-painting and numbering of all of our models.

In order to clean the model, you should wipe it with a damp cloth, or a cloth wet with a mild soap solution, and wipe dry.

Avoid placing the model in direct sunlight for extended periods. A cloth cover or case will help keep the model clean. Plastic covers should not be used.
